# Cook from your cupboard discover recipes

About _____ This App main point is for users to explore a variety of recipes using ingredients they already have at home. It suggests a convenient and practical approach to cooking by making the most of what's in their cupboard.

Design Process

The process of designing an interface can be divided into a number of stages. Design thinking is a non-linear, iterative process that teams use to understand users, challenge assumptions, redefine problems and create innovative solutions to prototype and test.

Empathise

- Conduct research
- Competitor analysis
- Understand users

Define

- Observe persona
- User persona
- User scenario

Ideate

- Brain storming
- User flow
- Paper sketch

Prototype & Test

- Low-Fi
- Hi-Fi
- Visual Design
- Interaction
